GIANMARCO MONTELLA

ABOUT ME

A highly motivated Computer Engineering and Cybersecurity student driven by curiosity and a passion for solving complex problems. I combine a rigorous technical mindset with strong adaptability, honed through international work experience and intensive software development programs. I thrive in dynamic, collaborative environments and am eager to bring my energy and analytical skills to an innovative tech team

SKILLS

Technical Skills

- Programming Languages: C, C++, Swift
- Mobile Development: iOS (Xcode)
- UI/UX Design: Sketch
- Operating Systems: Windows, macOS

Soft Skills

- Problem Solving
- Teamwork & Collaboration
- Adaptability & Flexibility
- Effective Communication

LANGUAGE PROFICIENCY

Italiano: native
Inglese: professional

CONTACTS

FORMAZIONE

Bachelor's Degree in Computer Engineering and Cybersecurity (L-8)
Università degli Studi di Napoli "Parthenope"
2023 - Present

- **Core Coursework:** Programming, Algorithms & Data Structures, Cybersecurity, Computer Networks, Database Management Systems.
- Deepening knowledge in network protocols, cryptographic systems, and secure software engineering.

High School Diploma in Telecommunications (Grade: 83/100)
I.T.I.S. Enrico Fermi - Gadda, Naples
2017 - 2022

- Acquired solid foundations in electronics, networking systems, and communication protocols.

ESPERIENZE PROFESSIONALI

Receptionist (Erasmus+ Internship)
4 & 5-Star Hotels, Malta
February 2023 - May 2023

- Managed international guest relations, significantly enhancing professional English communication skills.
- Demonstrated strong problem-solving capabilities by independently handling high-pressure situations and guest requests.
- Ensured operational excellence through effective front-desk management and cross-departmental coordination.

Advanced Apple Foundation Program
Apple Developer Academy, Naples
January 2026 - February 2026

- Advanced specialization in iOS development, focusing on complex app architectures and advanced SwiftUI features.
- Deepened knowledge in data persistence, API integration, and performance optimization.
- Collaborated in agile teams to develop high-fidelity prototypes.

Apple Foundation Program
Apple Developer Academy, Napoli
October 2025 - November 2025

- Completed an intensive program focused on the Apple ecosystem and Swift programming.
- Mastered UI/UX design principles using Sketch and implemented interfaces with SwiftUI.
- Applied Challenge-Based Learning (CBL) to solve real-world design and development problems.
